

AMERICOLD BARCELONA SANTA PERPETUA establishes a new logistics center for cold storage of high turnover consumer goods in Santa Perpètua de Mogoda

Through the AGROEXPANSE project, a new high-capacity logistics center has been constructed, located in Santa Perpètua de Mogoda, for consumer goods with high turnover highly energy efficient and automated. It is intended to convert the facilities located in Sta. Perpetua into a strategic space in terms of storage and logistics in this type of products.

With the project, the facilities of Sta. Perpetua allow a significant expansion of capacity, with an increase of 6,300 m2, with the incorporation of a total of about 12,200 pallets of frozen and refrigerated storage capacity, fully convertible.

The new facilities are distributed in 6 differentiated areas, 4 zones for frozen products, 1 for fresh products and 1 dispatch area.

It should be noted that the expansion project has increased the capacity of managed pallets by 27.75%, in addition to the creation of 929 new picking locations and a total of 11 docks.

In addition, the company planned to hire a total of 34 jobs related to the new process of storage of high-turnover products, for two years.

This action has been carried out with the support of ACCIÓ (<https://www.accio.gencat.cat>), within the framework of the high-impact business investment project in fixed assets.
